

Leicestershire  
**Take AIR**  
ACTION FOR INHALER RECYCLING

# Did you know that your inhalers can be recycled through the post?\*

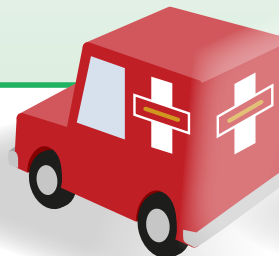

**This hospital is taking part in the Take AIR inhaler recycling scheme. Take home a pre-paid, pre-addressed postage envelope today.**

The Leicestershire **Take AIR (Action for Inhaler Recycling)** scheme enables you to safely and effectively recycle your empty, unwanted or out-of-date inhalers through the post. The Take AIR scheme accepts all inhalers, of any brand, such as:

- Pressurised metered dose inhalers or 'puffer' inhalers
- Dry powder Inhalers
- Soft mist inhalers

Recycling inhalers is a simple way to help the environment.

Place the inhalers into the envelope and seal it. Ideally wait and send three or four inhalers at a time in each envelope, as this will increase the benefits of the scheme. Post the sealed envelope through your local Royal Mail post box and we will do the rest.

**Post the sealed envelope through your local Royal Mail post box and we will do the rest.**

This is a Chiesi Limited scheme supported by University Hospitals of Leicester NHS Trust and Leicestershire and Rutland Local Pharmaceutical Committee (LPC).

\* Currently available only in the Leicester, Leicestershire and Rutland (LLR) area
